PROFESSIONAL SUMMARY

Technology has inspired me since childhood, and that passion fuels my dedication to building real, impactful software. I bring strong full-stack capabilities, a leadership mindset, and a relentless drive to improve with every project I take on. I'm looking for opportunities where I can grow, collaborate, and deliver meaningful results.

TECHNICAL SKILLS

Languages: Java, Python, HTML, CSS, JavaScript, TypeScript

Frameworks: Next.js, Expo, Flutter, JavaFX, JFrame (Swing)

Backend & Database: Node.js, SQL, Supabase

Mobile Development: Flutter, Expo (React Native)

Tools & Other: Git, REST APIs, Full-Stack Web Development, GUI Development

EDUCATION

Bachelor of Science in Information Technology

Phinma Coc Puerto — 3rd Year Student

PROJECTS

All projects developed as Team Leader — responsible for planning, architecture decisions, and delegating tasks.

Agusan National High School Student Information System (SIS)

[Next.js](#) | [Flutter](#) | [Supabase](#) | [Full-Stack](#)

- Led the development of a complete student information system with both web and mobile applications.
- Built the web platform using Next.js with server-side rendering and dynamic routing capabilities.
- Developed a cross-platform mobile app using Flutter for on-the-go student data access.
- Designed and implemented the backend using Supabase for real-time database, authentication, and API services.

Student List Management System

[Python](#) | [GUI Development](#)

- Led development of a desktop application with graphical user interface for managing student records.
- Implemented CRUD operations with data validation and user-friendly form interfaces.

Banking System

[Java](#) | [JFrame \(Swing\)](#) | [GUI Development](#)

- Led the creation of a desktop banking simulation with account management features.
- Designed intuitive UI components using Java Swing for account operations and transaction handling.

JavaFX GUI Application

[Java](#) | [JavaFX](#)

- Led the development of a modern desktop application using JavaFX framework with responsive UI design.
- Implemented scene-based navigation and styled components with CSS-like styling capabilities.

EXPERIENCE

Student Facilitator (SF) — ID Station Assistant

[\[University Name\]](#) | [\[Time Period, e.g., 2024 – Present\]](#)

- Assisted students with ID-related concerns at the campus ID station, providing efficient and friendly service.
- Gained hands-on experience retrieving and managing student account information with accuracy and confidentiality.
- Developed strong communication and problem-solving skills through daily student interactions.
- Learned to navigate administrative systems and handle sensitive data responsibly.
